

Số: 2681/TĐC-HTQT

Hà Nội, ngày 17 tháng 07 năm 2026

V/v cảnh báo về dự thảo sửa đổi Quy
định (EU) 2022/1616 đối với nhựa và sản
phẩm nhựa tái chế tiếp xúc thực phẩm

Kính gửi:

- Cục Xuất nhập khẩu, Bộ Công Thương;
- Vụ Phát triển thị trường nước ngoài, Bộ Công Thương;
- Liên đoàn Thương mại và Công nghiệp Việt Nam (VCCI);
- Hiệp hội Nhựa Việt Nam (VPA);
- Công ty cổ phần sản xuất nhựa Duy Tân;
- Công ty TNHH Polytech Far Eastern;
- Sở Khoa học và Công nghệ các tỉnh, thành phố.

Ngày 16/4/2026, Liên minh Châu Âu (EU) đã gửi thông báo số G/TBT/N/EU/1203 cho Ủy ban Hàng rào kỹ thuật trong thương mại (TBT) của Tổ chức Thương mại Thế giới (WTO) về dự thảo Quy định của Ủy ban Châu Âu sửa đổi Quy định (EU) 2022/1616 quy định việc quản lý Sổ đăng ký của Liên minh (Union Register), chứng từ chứng minh sự tuân thủ, phương pháp thử nghiệm và tài liệu phải xuất trình khi thông quan đối với nhựa và sản phẩm nhựa tái chế tiếp xúc thực phẩm.

Theo nội dung thông báo, dự thảo áp dụng đối với nhựa và các sản phẩm từ nhựa (mã HS 39) và vật liệu, sản phẩm tiếp xúc thực phẩm (mã ICS 67.250), trong đó đáng chú ý là nhựa PET tái chế và các sản phẩm bao bì, dụng cụ gia dụng có chứa thành phần nhựa tái chế xuất khẩu vào EU.

Dự thảo dự kiến được thông qua vào ngày 30/9/2026 và có hiệu lực sau 21 ngày kể từ ngày đăng Công báo EU. Theo dự thảo, một số nội dung sửa đổi có thể ảnh hưởng trực tiếp đến hoạt động sản xuất, xuất khẩu của doanh nghiệp Việt Nam, để hỗ trợ các cơ quan quản lý, hiệp hội ngành hàng và doanh nghiệp chủ động theo dõi, chuẩn bị phương án tuân thủ, Ủy ban Tiêu chuẩn Đo lường chất lượng Quốc gia thông tin một số nội dung đáng chú ý của dự thảo như sau:

- Bổ sung yêu cầu chứng từ tuân thủ theo từng công đoạn sản xuất, gồm: Tuyên bố P (đối với nguyên liệu nhựa đầu vào), Tuyên bố A (đối với nhựa tái chế từ nhà tái chế), Tuyên bố B (đối với nhựa tái chế đã qua gia công), và Tuyên bố C dạng đơn giản hóa (áp dụng cho công đoạn cuối chuỗi sản xuất);

- Bổ sung yêu cầu xuất trình mã CN/TARIC và chứng từ tương ứng khi làm thủ tục hải quan thông quan vào EU đối với nhựa PET tái chế, dụng cụ/đồ gia dụng bằng nhựa có thành phần tái chế, và tấm nhựa nhiều lớp có lớp PET tái chế;

- Chuyển đổi toàn bộ quy trình đăng ký, nộp hồ sơ giám sát tuân thủ (Compliance Monitoring Summary Sheet - CMSS) và cập nhật trạng thái cơ sở tái chế sang hệ thống đăng ký điện tử của EU, thay cho cách thức trao đổi thủ công như hiện nay;

- Quy định thời hạn tự động: hồ sơ đăng ký sẽ tự động chuyển sang trạng thái “chờ đánh giá” (audit-pending) nếu quá 01 năm kể từ ngày bắt đầu sản xuất mà chưa hoàn tất việc đánh giá;

- Quy định thời gian chuyển tiếp: 03 tháng đối với Tuyên bố A/B và 06 tháng đối với Tuyên bố C/P, kể từ ngày Quy định sửa đổi có hiệu lực.

Đặc biệt lưu ý, theo Quy định (EU) 2022/1616 hiện hành, để cơ sở tái chế được chuyển trạng thái đăng ký sang “Kích hoạt” (Active) trên Sổ đăng ký của Liên minh và đủ điều kiện đưa sản phẩm vào thị trường EU, doanh nghiệp phải được “cơ quan có thẩm quyền” (competent authority) trong nước trực tiếp thẩm định, đánh giá và thông báo chính thức cho Ủy ban châu Âu; doanh nghiệp không được tự thông báo, kể cả khi có xác nhận từ cơ quan khác.

Nhằm chủ động chuẩn bị phương án tuân thủ đối với quy định nêu trên, Ủy ban Tiêu chuẩn Đo lường Chất lượng Quốc gia (Ủy ban) kính đề nghị:

1. Đối với các cơ quan quản lý

Nghiên cứu nội dung dự thảo; phối hợp với Ủy ban rà soát các doanh nghiệp thuộc phạm vi quản lý có hoạt động sản xuất, xuất khẩu nhựa và sản phẩm nhựa tái chế sang EU để kịp thời phổ biến thông tin, hướng dẫn doanh nghiệp chuẩn bị phương án đáp ứng các yêu cầu của Quy định.

2. Đối với các hiệp hội ngành hàng và doanh nghiệp

Nghiên cứu nội dung dự thảo; rà soát tình trạng đăng ký (RIN/RON/RFN) và hồ sơ giám sát tuân thủ (CMSS) của cơ sở sản xuất và mức độ sẵn sàng đáp ứng các yêu cầu mới về chứng từ theo chuỗi sản xuất; đồng thời chủ động chuẩn bị phương án đáp ứng các quy định dự kiến được sửa đổi.

Trường hợp có khó khăn, vướng mắc hoặc cần trao đổi liên quan đến việc triển khai quy định, đề nghị liên hệ Ủy ban Tiêu chuẩn Đo lường Chất lượng Quốc gia để được hướng dẫn, hỗ trợ. Các ý kiến góp ý, khó khăn, vướng mắc hoặc đề xuất liên quan đến dự thảo Quy định đề nghị gửi về Ủy ban Tiêu chuẩn Đo lường Chất lượng Quốc gia (Ban Hợp tác quốc tế và TBT), địa chỉ: số 8 Hoàng Quốc

Việt, phường Nghĩa Đô, thành phố Hà Nội; email: tbtvn@mst.gov.vn **trước ngày 27/7/2026** để tổng hợp, phối hợp xử lý.

Trân trọng cảm ơn./. 

Nơi nhận:

- Như trên;
- Chủ tịch Nguyễn Nam Hải (để b/c);
- Phó Chủ tịch Trần Hậu Ngọc;
- Lưu: VT, HTQT.

Committee on Technical Barriers to Trade

Original: English

NOTIFICATION

The following notification is being circulated in accordance with Article 10.6

1. Notifying Member: <u>EUROPEAN UNION</u> If applicable, name of local government involved (Articles 3.2 and 7.2):
2. Agency responsible: European Commission EU-TBT Enquiry Point, Fax: +(32) 2 299 80 43, E-mail: grow-eu-tbt@ec.europa.eu Website: https://technical-barriers-trade.ec.europa.eu/en/home
3. Notified under Article 2.9.2 [X], 2.10.1 [], 5.6.2 [X], 5.7.1 [], 3.2 [], 7.2 [], Other:
4. Products covered (HS codes or national tariff lines. ICS numbers may be provided in addition, where applicable): PLASTICS AND ARTICLES THEREOF (HS 39); Materials and articles in contact with foodstuffs (ICS 67.250)
5. Details of notified document(s) (title, number of pages and languages, means of access): Draft Commission Regulation amending Regulation (EU) 2022/1616 as regards the management of the Union register, compliance documentation, test methods, and documents to be presented upon release for free circulation; (18 page(s), in English), (21 page(s), in English) Link to notified document(s) and/or contact details for agency or authority which can provide copies upon request: https://members.wto.org/crnattachments/2026/TBT/EEC/26_02112_00_e.pdf https://members.wto.org/crnattachments/2026/TBT/EEC/26_02112_01_e.pdf European Commission EU-TBT Enquiry Point Fax: + (32) 2 299 80 43 E-mail: grow-eu-tbt@ec.europa.eu The text is available on the Website: https://technical-barriers-trade.ec.europa.eu/en/home
6. Description of content: This draft amendment to Regulation (EU) 2022/1616 aims to address current challenges improving the documentation and controls of recycled plastics including those imported to the EU, to provide the legal basis for the creation of the TARIC codes, and to streamline with an interactive digital platform the procedure for registration by industry and the management of the recycling installations by national authorities.
7. Objective and rationale, including the nature of urgent problems where applicable: Food safety; ; Protection of human health or safety; Protection of the environment

8. Relevant documents:

- Draft Text amending Regulation (EU) 2022/1616 as regards the management of the Union register, compliance documentation, test methods, and documents to be presented upon release for free circulation;
- Draft Annexes

9. Proposed date of adoption: 30 September 2026

Proposed date of entry into force: 21 days from publication in the Official Journal of the EU (The provisions shall apply from entry into force)

10. Provision of comments

Final date for comments: 15 June 2026

[X] 60 days from notification

Contact details of agency or authority designated to handle comments regarding the notification:

European Commission,
EU-TBT Enquiry Point,
Fax: + (32) 2 299 80 43,
E-mail: grow-eu-tbt@ec.europa.eu

COMMISSION REGULATION (EU) .../...

of **XXX**

**amending Regulation (EU) 2022/1616 as regards the management of the Union register,
compliance documentation, test methods, and documents to be presented upon release
for free circulation**

(Text with EEA relevance)

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

COMMISSION REGULATION (EU) .../...

of **XXX**

amending Regulation (EU) 2022/1616 as regards the management of the Union register, compliance documentation, test methods, and documents to be presented upon release for free circulation

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1935/2004 of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact with food and repealing Directives 80/590/EEC and 89/109/EEC¹, and in particular Article 5(1), second subparagraph, points (h), (i) and (k), thereof,

Whereas:

- (1) Commission Regulation (EU) 2022/1616² lays down rules on development and suitability of recycling technologies and authorisation of recycling processes, as well as on the manufacturing, marketing and use of plastic materials and articles containing plastic originating from waste.
- (2) The experience gained since the entry into force of that Regulation shows that the rules in regard to the registration of recycling installations need to be laid down in more detail and the use of compliance documentation in the supply chain need to be clarified.
- (3) Regulation (EU) 2022/1616 requires that recyclers and converters issue a declaration of compliance. The Declaration described in Part A of Annex III (Declaration A) is to be provided by recyclers, while the Declaration described in Part B of Annex III (Declaration B) is to be provided by converters. However, to allow all business operators in the supply chain to verify and ensure compliance with Regulation (EU) 2022/1616, maintain traceability and facilitate the work of the competent authorities, a declaration of compliance should be provided by operators also at other manufacturing stages within the supply chain other than to consumers. Yet, to avoid excessive burden

¹ OJ L 338, 13.11.2004, p. 4, ELI : <http://data.europa.eu/eli/reg/2004/1935/oj>.

² Commission Regulation (EU) 2022/1616 of 15 September 2022 on recycled plastic materials and articles intended to come into contact with foods, and repealing Regulation (EC) No 282/2008 (OJ L 243, 20.9.2022, p. 3, ELI : <http://data.europa.eu/eli/reg/2022/1616/oj>).

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

on operators at the end of the supply chain, food business operators that use plastic with recycled content to pack food should not be obliged to provide a declaration of compliance where they provide the necessary instructions and information on recycled content by means of labelling.

- (4) In accordance with Article 16 of Regulation (EC) No 1935/2004, when issuing a declaration of compliance, operators are to have available supporting documentation demonstrating compliance. In order to facilitate compliance with this obligation, it is appropriate to clarify that for the purposes of Regulation (EU) 2022/1616 such documentation should comprise declarations received from previous manufacturing stages and other documentation concerning the compliance of the recycled plastic with Regulation (EU) 2022/1616, and that it should be available already at the time when operators issue their declaration of compliance and be submitted to the competent authority, upon its request, within ten working days.
- (5) Experience shows that indicating batch numbers in the declaration of compliance to be provided to converters and operators using recycled plastic at its final production stage, is complex and it is not needed after the point in the manufacturing chain where the composition of the plastic is not further modified since the traceability can then be adequately ensured based on the received declarations of compliance. Thus, converters and operators using post-processed recycled plastic at its final production stage should be allowed to issue a simplified declaration ('Declaration C'), without assigning new batch numbers, and adapted to the final manufacturing stages. However, to ensure efficient enforcement, such declaration should list the recycling installations used in the manufacture of the constituent parts of the articles made of recycled content.
- (6) In order for recyclers receiving partially pre-processed plastic input and plastic input and for competent authorities to ascertain whether the plastic input is compliant with Regulation (EU) 2022/2016 and to trace it in case there are questions over its quality or origin, a Declaration of compliance should be issued at all marketing stages of pre-processing stages and for resulting batches of plastic input. This declaration should be referred to as Declaration P. The respective batches should be labelled with a batch number to facilitate their identification.
- (7) Commission Regulation (EU) No 10/2011³ allows the reprocessing of off-cuts and scraps. Regulation (EU) 2022/1616 does not explicitly allow for it. However, as such reprocessing may also be carried out with off-cuts and scraps of recycled plastic, rules in this regard should be laid down in accordance with the principles set out in Regulation (EU) No 10/2011.
- (8) Plastic waste, partially pre-processed plastic input, plastic input, recycled plastic, partially post-processed recycled plastics, recycled plastic materials and articles and products made thereof are increasingly imported into the Union, and are to comply

³ Commission Regulation (EU) No 10/2011 of 14 January 2011 on plastic materials and articles intended to come into contact with food (OJ L 12, 15.1.2011, p. 1, ELI: <http://data.europa.eu/eli/reg/2011/10/oj>).

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

with Regulation (EU) 2022/1616 when placed on the Union market. To prevent that non-compliant plastic materials and articles with recycled content are released into free circulation on the Union market, and to maintain traceability of the origin of the imported materials, Union's customs authorities should receive the relevant declaration of compliance as required by Regulation (EU) 2022/1616 at the time the release into free circulation on the Union market is requested. To this purpose it is appropriate to introduce commodity codes for those plastics. However, introducing commodity codes for all recycled plastics at different stages of their manufacturing chain would require detailed differentiation for individual polymers, packed foods and certain other products such as appliances, as well differentiation to marketing stages. This would require the introduction of very many codes, which would be burdensome and increase the risk of misinterpretation at the border. Considering the number of codes that would be required and that only polyethylene terephthalate ('PET') is presently produced with a suitable technology and subject to recycled content targets under Union environmental legislation such codes should only be introduced for kitchenware and tableware and for PET including if part of multi-layer materials, but not for packed food, appliances and food processing equipment even if packed in or manufactured from PET.

- (9) In order to facilitate the task of the customs authorities, and to prevent misidentification and fraud, declarations of compliance supplied with plastic with recycled content that originates from third countries should mention the commodity codes used to import recycled plastic materials in accordance with the Union customs legislation.
- (10) The registration status of decontamination installations has significant impact on the respective use of those installations and is an important safeguard to avoid the placement of unsafe recycled plastic on the Union market. However, the full implementation of the registration status in accordance with Article 24(2), point (g) of Regulation (EU) 2022/1616 is hindered by the lack of clearly defined procedures and the list of possible statuses of installation in the Register does not allow to distinguish between different scenarios and needs to be completed to reflect all possible situations during the lifecycle of an installation. Furthermore, the current registration also does not allow operators and competent authorities to change the status when the use of an installation changes, which slows down its implementation administratively and increases the risks for mistakes. Therefore, it is important for the management of the Union register of novel technologies, recyclers, recycling processes, recycling schemes and decontamination installations ('the Register') to facilitate the access to the system for operators and competent authorities by creating an electronic registration system where operators are to enter and modify directly their respective information under the competent authorities' supervision.
- (11) There are currently no defined rules as regards the detailed specifications of pre-processed plastic input such as those reported in appendix A to opinions concerning recycling processes that the European Food Safety Authority publishes. In order to ensure safety, maximum limits concerning these specifications and methods to verify

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

compliance should be laid down. A method for this purpose is already provided for in Annex A of ISO 12418-2:2012 which should be considered as appropriate for this purpose. Further methods for the same purpose are being developed and should also be allowed provided that they have an equal or better performance.

- (12) Regulation (EU) 2022/1616 should therefore be amended accordingly.
- (13) In order to allow operators to adapt to the changes established with this Regulation but considering that those changes are necessary to protect human health and are of an administrative nature only, products complying with Regulation (EU) 2022/1616, as applicable before the date of the entry into force of this Regulation, and for which Declarations A or B are required should be allowed to be placed on the market for a period of three months after the entry into force of this Regulation even if they do not comply with the rules concerning those Declarations laid down in this Regulation. However, as operators need information from earlier stages to issue Declaration C and a declaration was not required at pre-processing stages before, products complying with Regulation (EU) 2022/1616, as applicable before the date of the entry into force of this Regulation, and for which this Regulation requires Declarations C or P, should be allowed to be placed on the market without those declarations for a period of six months after the entry into force of this Regulation. In order to ensure a smooth transition, it should be possible to manufacture recycled plastic materials and articles from such products placed on the market during the transitional periods and place them on the market until exhaustion of stocks.
- (14) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1

Amendments to Regulation (EU) 2022/1616

Regulation (EU) 2022/1616 is amended as follows:

- (1) Article 2(3) is amended as follows:
 - (a) point (13) is replaced by the following:

‘(13) ‘decontamination installation’ means specific interconnected equipment installed at a recycling facility operating a decontamination process.’
 - (b) the following points (21) and (22) are added:

‘(21) ‘release for free circulation’ means the procedure laid down in Article 201 of Regulation (EU) No 952/2013 of the European Parliament and of the Council*;

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

(22) ‘sheet’ means intermediate plastic articles extruded into a flat shape of sufficient size and thickness to be stiff at ambient temperature and suitable for manufacturing thermoformed trays.

* Regulation (EU) No 952/2013 of the European Parliament and of the Council of 9 October 2013 laying down the Union Customs Code (OJ L 269, 10.10.2013, p. 1, ELI: <http://data.europa.eu/eli/reg/2013/952/oj>).’;

(2) in Article 4, paragraph 8 is replaced by the following:

‘8. The registration status indicated in the register established by Article 24 for the decontamination installation at the time of manufacture of each batch of recycled plastic contained in the recycled plastic material or article shall be either ‘newly registered’, ‘being established’ or ‘active’.’;

(3) Article 5 is amended as follows:

(a) the heading is replaced by the following:

‘Requirements for labelling’;

(b) paragraphs 1 and 2 are deleted;

(c) point (e) of paragraph 3 is replaced by the following:

‘(e) when the declarations referred to in Article 5a provide additional instructions, the symbol defined in ISO 7000 with reference number 1641.’

(5) the following Article 5a is inserted:

*‘Article 5a
Requirements for compliance documentation’*

1. At marketing stages other than the retail stage, business operators shall provide a declaration of compliance in accordance with Article 16 of Regulation (EC) No 1935/2004 for materials and articles subject to this Regulation.

2. Business operators shall establish the declarations of compliance referred to in paragraph 1 in accordance with Article 29.

3. Business operators shall only accept plastic materials, articles or food with packaging subject to this Regulation, that are accompanied by the appropriate declaration of compliance.

4. By derogation to paragraph 1, food business operators that use products with recycled content to pack food may not provide a declaration of compliance to retailers and to the distributors supplying to retailers where all the following conditions are met:

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

- (a) relevant information and instructions needed for the retailers to ensure compliance with this Regulation and for consumers to ensure the safe use of the products with recycled content are provided through labelling or through other appropriate documentation;
- (b) any information concerning the recycled content of the products with recycled content does not differ from the information contained in the declaration received by the food business operator in accordance with paragraph 1.

In this case paragraph 3 shall not apply.

Upon request from competent authorities, retailers or distributors supplying to retailers, food business operators that use recycle plastic to pack food shall provide within ten working days from the request, where the request is made in the context of a control by a competent authority, or otherwise within twenty working days from the request, one of the following declarations of compliance:

- a) the declaration of compliance that they have received from their supplier;
- b) a new declaration of compliance issued by them.

5. Business operators shall ensure that supporting documentation to demonstrate that the products that they place on the market comply with the requirements of this Regulation is stored in their documentation systems at the time of issuance of the declaration of compliance. In case of recycled plastic, the documentation shall include all relevant records kept in accordance with Article 7(4).

Supporting documentation shall be made available within ten working days to competent authorities on their request.

6. A declaration of compliance may be provided as a signed digital document, provided that it can be made available without delay as a single document that can be read and printed with commonly available software.

7. The release into free circulation of the following products is subject to the presentation to the customs authorities of the documentation listed in Table 6 of Annex I, under the specified commodity codes:

- a) products containing recycled plastic manufactured with a suitable recycling technology where column 11 of Table 1 of Annex I indicates 'yes', as well as partially pre-processed plastic input, plastic input and recycled plastic intended for use in the manufacture thereof, except packaged food, food processing equipment and appliances;
- b) tableware and kitchenware falling within CN code ex 3924 10 00 and CN code ex 924 90 00, if that contains recycled plastic;
- c) multi-layer sheets containing at least one layer of recycled PET used behind a functional barrier layer, irrespective of the composition of the barrier layer, as well as

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

plastic input and recycled PET intended for the manufacture of such layers of recycled PET.’

(6) Article 7 is amended as follows:

(a) the following paragraph 1a is inserted:

‘1a. Batches of plastic input material shall only be accepted for decontamination provided they are accompanied by Declaration P issued in accordance with Article 29(1).

Where the recycler directly obtains plastic waste or partially pre-processed plastic input and applies any further pre-processing operations in order to produce plastic input, the recycler shall ensure that a record concerning that plastic input is stored in its documentation system when the recycling of the input batch starts and that it contains data and statements equivalent to those laid down in Article 29(1) for Declaration P.

Declaration P, or the equivalent record, shall be retained by the recycler for a period of at least 5 years.

Competent authorities may request to have access to Declaration P. The recycler shall make it available to the competent authority within 10 working days.’;

(b) paragraph 4 is replaced by the following:

‘4. Each batch of plastic shall be subject to a single record regarding its quality, and shall be identified by a unique number and the name of the manufacturing stage from which it originates. The batches shall correspond to the definition in Section 2.4 of the compliance monitoring summary sheet referred to in paragraph 3, point (c).

A repository of these records shall be maintained in accordance with the format laid down in Section 4.1 of the compliance monitoring summary sheet referred to in paragraph 3, point (c).

Each record shall be retained for a period of at least five years.’;

(7) Article 8 is amended as follows:

(a) paragraph 1 is replaced by the following:

‘1. The following obligations shall apply to converters:

(a) converters shall post-process recycled plastic in accordance with the instructions in section 3 of the declaration of compliance that they have received in accordance with Article 5a; and,

(b) where instructions are necessary to ensure the safe use or compliance with this Regulation of the recycled plastic or recycled plastic or articles, converters shall communicate such instructions to subsequent converters and users by

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

means of section 3 of the declaration that they provide in accordance with Article 5a.’

(b) the following paragraphs 1a and 1b are inserted:

‘1a. Off-cuts and scraps of recycled plastic and recycled plastic materials and articles manufactured in compliance with this Regulation may be added to recycled plastic during post-processing operations where all of the following conditions are met:

(a) the provisions applicable to reprocessing laid down in Article 10(2) of Regulation (EU) No 10/2011 are complied with, except Article 10(2), point (c), thereof;

(b) the off-cuts and scraps are accompanied either by Declaration B or by Declaration C, issued in accordance with Article 29, and such Declaration includes the information required in accordance with point 10 of Annex IV to Regulation (EU) No 10/2011.

1b. At each manufacturing stage subject to the verification of the quality, including at intermediate stages if any, batches of recycled plastic processed by the converter shall be subject to a single record regarding their quality, and shall be identified by a unique number and the name of the manufacturing stage from which they originate.

The converter shall maintain a repository of those records and shall retain each record for a period of at least five years.’

(c) paragraph 2 is replaced by the following:

‘2. Food business operators shall use recycled plastic materials and articles in accordance with the instructions included in section 3 of the declaration that they have received in accordance with Article 5a or with the instructions received in accordance with Article 5a(4).

They shall communicate all relevant instructions to consumers of food packed in such materials and articles, and to other food business operators.’;

(8) in Article 9, paragraph 1 is replaced by the following:

‘1. A single legal entity shall act as the manager of a recycling scheme and shall be responsible for the overall functioning of the recycling scheme.

At least 15 working days prior to the start of the operation of a recycling scheme the manager of the recycling scheme shall inform, via the electronic registration system, the competent authority in the territory where it is established and the Commission for the purpose of its registration in the register established by Article 24.

The manager shall provide, in the electronic registration system, its name, address, contact persons, the name of the scheme, a summary of the scheme not exceeding 300 words, the marking referred to in paragraph 5, a list of territories where business

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

operators participating in the schemes are located and references to any decontamination installations used by the scheme. Thereafter, the manager shall ensure this information is kept up to date.’

b) in paragraph 6, point (b) is replaced by the following:

‘(b) they are used only for the purpose of production, distribution, storage, display and sale of the foods which they are intended for;’;

(9) Article 10 is amended as follows:

(a) paragraph 2 is replaced by the following:

‘2. At least six months prior to the start of the operation of the first decontamination installation operated on the basis of Article 4(3), point (b), the developer shall register the novel technology by means of the electronic registration system referred to in Article 24(5). The status of the ‘novel technology’ shall be ‘newly established’.

For the purposes of the registration of the novel technology in the register established by Article 24, the developer shall include in the electronic registration its name, address, contact persons, the name of the novel technology, a summary of the novel technology not exceeding 300 words, an Uniform Resource Locator (‘URL’) locating the reports referred to in paragraph 4 and Article 13(4), and the names and addresses or numbers of any recycling facilities at which the development of the technology is foreseen to take place.’;

(b) paragraph 8 is replaced by the following:

8. A competent authority that was notified in accordance with paragraph 2 shall verify within five months from the notification whether the requirements set out in paragraphs 1 to 6 are met and verify the requirements forthcoming from paragraph 7 regularly thereafter.

Where the competent authority considers that the requirements set out in paragraphs 1 to 6 are met, the competent authority shall change the status of the novel technology to ‘verified’ in the electronic registration system.

In case the competent authority cannot verify compliance with the requirements set out in paragraphs 1 to 6, it shall notify its concerns to the developer. The notified novel technology shall then remain ‘newly established’ until the developer has satisfactorily addressed the concerns of the competent authority.

When the status of the novel technology is ‘verified’, the novel technology will be listed in the Register.

(10) Article 24 is amended as follows:

(a) in paragraph 2, point (g) is replaced by the following:

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

‘(g) the registration status of decontamination installations and the history of the registration status of each entity by displaying the date of the modification and the status prior to the modification;’

(b) paragraphs 3 and 4 are replaced by the following:

‘3. The Register shall contain unique identification numbers as follows:

- recycling authorisation number (‘RAN’) for authorised recycling processes;
- recycler operator number (‘RON’) for recyclers;
- recycling installation number (‘RIN’) for decontamination installations;
- recycling scheme number (‘RSN’) for recycling schemes;
- recycling facility number (‘RFN’) for recycling facilities; and
- novel technology number (‘NTN’) for novel recycling technologies.

4. For the purposes of paragraph 2, point (g), the registration status of an installation shall mean:

- (a) ‘newly registered’: the installation has been registered and may be operating, but the recycler has not submitted the compliance monitoring summary sheet;
- (b) ‘being established’: the installation is registered and operating, and the recycler has submitted the compliance monitoring summary sheet to the competent authority in the territory where it is located but the audit referred to in Article 26(3) was not yet completed ;
- (c) ‘active’: the installation is operating, the compliance monitoring summary sheet has been submitted and the competent authority has completed the audit referred to in Article 26(3) ;
- (d) ‘inactive’: the installation is not in use for reasons other than those under points (e), (f) and (g);
- (e) ‘suspended’: the use of the installation was suspended by a competent authority due to non-compliance with this Regulation;
- (f) ‘audit pending’: the audit referred to in Article 26(3) was not completed within the applicable deadline;
- (g) ‘decommissioned’: the recycler has permanently stopped using the installation.

5. The following rules shall apply to the deletion of entries in the Register:

- (a) when the registration status of a decontamination installation is either ‘suspended’ or ‘audit pending’ and it remains unchanged for one year, the

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

entry regarding the relevant installation shall be automatically deleted from the Register.

- (b) when the registration status of a decontamination installation is 'decommissioned', the entry regarding the relevant installation shall be automatically deleted from the Register after one year from the date of publication of that status in the Register.
 - (c) entries related to 'operators', 'facilities', 'novel technologies' and 'recycling schemes' that are linked with a deleted entry regarding a decontamination installation shall remain in the Register until all dependent entries have been deleted from the Register.
 - (d) After deletion, entries shall remain archived in the electronic registration system subject to Article 24a and shall remain accessible to the Commission and the competent authorities of the Member States.
- (11) the following Article 24a is inserted:

'Article 24a

Electronic registration system

1. For the purpose of the management of the Register, a non-public electronic registration system shall be used by competent authorities and operators.

The electronic registration system shall contain the information specified in Article 10(2) and article 24(2) and (4), as well as a contact information including contact persons, a list of competent authorities, and any other information that is necessary for the purpose of managing the Register.

Competent authorities shall be able to modify the information regarding the 'operators', 'facilities', 'decontamination installations', developers of 'novel technologies' and entities managing 'recycling schemes' located in their territory.

Only competent authorities from Member States shall be able to read all information kept in the electronic registration system.

3. Competent authorities shall ensure the completeness and the accuracy of the information contained in the electronic registration system regarding the 'operators', 'facilities', 'decontamination installations', developers of 'novel technologies' and entities managing 'recycling schemes' located in their territory.

- (12) Article 25 is replaced by the following:

'Article 25

Registration of recyclers and decontamination installations

1. At least 30 working days prior to the start date of the production of recycled plastic in a decontamination installation, the recycler shall register the installation

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

using the electronic registration system referred to Article 24a(2) stating the following information:

- (a) the registered recycling facility at which the installation is located;
- (b) the registered recycler that is responsible for the operation of the installation;
- (c) the recycling authorisation number, if such exists;
- (d) the registered novel technology, if the installation does not operate on the basis of a suitable technology;
- (e) the registered recycling scheme, if the installation is part of one;
- (f) the registered competent authority in the territory where the installation is located.

2. The name of the decontamination installation shall include the process name of the recycling process on which basis it operates.

The process name shall be one of the following:

- a) where the process is operated on the basis of an authorised process, the name of that process shall be used;
- b) where the process is operated on the basis of a novel technology, the name provided by the developer of that novel technology;
- c) in any other cases, a name assigned by the operator.

3. Following completion of the registration according to paragraph 1, the registration status shall become 'newly registered' and Article 26 shall apply.

4. The recycler shall communicate in the electronic registration system the start date of the production of recycled plastic by the day in which that manufacture begins.';

(13) Article 26 is amended as follows:

- (a) paragraphs 2, 3 and 4 are replaced by the following:

'2. Within 30 days from the start date of the production of recycled plastic with an installation, recyclers shall submit the compliance monitoring summary sheet in the electronic registration system. Recyclers using an installation based on a novel technology shall upload also the supplementary information and supporting documentation referred to in Article 11(6).

After submission of the compliance monitoring summary sheet, the status of the registration shall change automatically to 'being established'. The compliance monitoring summary sheet may only be replaced in the system following approval by the competent authority. The supplementary information and supporting documentation referred to in Article 11(6) shall be replaced in case of change.

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

3. The competent authority shall verify whether the information provided in the compliance monitoring summary sheet complies with this Regulation and shall perform an audit of the recycling installation in accordance with Article 27.

When compliance is established, the competent authority shall change the status in the electronic registration system to ‘active’.

When compliance cannot be established, the competent authority shall request the recycler to provide additional information or to change the configuration or operation of the installation. When needed the recycler shall update the compliance monitoring summary sheet without delay.

In case the competent authority subsequently considers that the configuration or operation of the recycling installation is still not compliant with the requirements of this Regulation, the competent authority shall change the status of the registration in the electronic register to ‘suspended’.

4. As from the date when the registration status is ‘active’, the recycler shall inform the competent authority without delay of any administrative or operational change that affects the information in the electronic registration system.

The recycler shall verify every six months whether the information in the electronic registration system is still accurate and confirm it to the competent authority via the electronic registration system.’;

(b) the following paragraph 5 is added:

‘5. If within one year from the start date of the production of recycled plastic in the decontamination installation the status of such installation is still ‘being established’, the registration in the electronic registration system shall automatically become ‘audit-pending’.’;

(14) the following Article 26a is inserted:

‘Article 26a

Deactivation and decommissioning of decontamination installations and change of the recycling process operated

1. The status of a decontamination installation shall become ‘inactive’ automatically in either of the following cases:

- (a) the compliance monitoring summary sheet and the required information and documentation are not submitted in the electronic registration system within three months since the status has become ‘newly registered’, in accordance with Article 26(2);
- (b) the recycler does not confirm the accuracy of the registration within 30 working days following the six months period referred to in Article 26(4), second subparagraph.

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

The competent authority and the recycler shall be automatically warned 30, 10 and 3 days before the status of an installation becomes 'inactive'.

2. The status of a decontamination installation shall become 'decommissioned' automatically six months after the date on which it has become 'inactive' pursuant to paragraph 1. The procedure set out in paragraph 4, second subparagraph, shall apply.

The Commission, the competent authority, and the recycler shall be automatically warned 30, 10 and 3 days before the status of an installation becomes 'decommissioned'.

3. A recycler may change the registration status of a decontamination installation to 'inactive' provided that the registration status has been 'active' or 'being-established' for at least five consecutive months directly prior to that change.

4. After at least six months from the date on which the status became 'inactive' in accordance with paragraph 3, the recycler may resume its recycling activity using the decontamination installation.

Where the inactive period lasted for less than 20 months, the registration status shall change automatically to the same status it had before becoming 'inactive'. If the status prior to the change was 'being-established', the expiry date of the one-year period referred to in Article 26(6) shall be delayed by the duration of the period in which the status was 'inactive'.

Where the inactive period lasted for 20 months or more, the registration status shall change to 'being-established'. The procedure laid down in Article 26 shall apply and the start date of the production shall be the day of the change of the registration status to 'being established'.

4. When the recycler does not longer operate a decontamination installation, it shall change its registration status to 'decommissioned'.

One year after the date of the status change to 'decommissioned', the entry concerning the decontamination installation shall be deleted automatically from the Register pursuant to Article 24(5)(b).

5. If a decontamination installation, the registration status of which has been changed to 'decommissioned' in accordance with paragraph 4, is planned to be operated according to a new recycling process, the recycler shall register it under a different name in accordance with Article 26 at least one day prior to the start of the production.

6. In case a decontamination installation is used for the manufacture of recycled plastic based on more than one recycling process, the installation shall be registered in accordance with Article 26 for each recycling process it is used for.'

(15) Article 27, is replaced by the following:

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

Official controls of recycling installations and recyclers shall include in particular audits in accordance with Article 14, point (i), of Regulation (EU) 2017/625.

(1) These audits shall be complemented by:

(a) an assessment of procedures on good manufacturing practices in accordance with Article 14, point (d), of Regulation (EU) 2017/625;

(b) an examination in accordance with Article 14, points (a) and (e), of Regulation (EU) 2017/625, of the compliance monitoring summary sheet established in accordance with Article 26, and, on the basis of that summary sheet, of the controls that operators have put in place and of documents and records referred to in that summary sheet.

(2) Official controls from national competent authorities and controls from third country competent authorities of recycling installations other than the verification that the installation is not being used in accordance with this Regulation shall not take place when the registration status is 'inactive', or 'decommissioned'.;

(16) Article 29 is replaced by the following:

‘Article 29

Specific requirements for declarations of compliance

1. When partially pre-processed plastic input and plastic input is placed on the market in the Union, batches shall be accompanied by a declaration of compliance stating that the conditions and requirements set out in Article 6 are met and in accordance with the description and template set out in Part P of Annex III. This declaration shall be referred to as ‘Declaration P’.

2. When recycled plastic is placed on the market in the Union, batches directly originating from a decontamination process shall be accompanied by a declaration of compliance in accordance with the description and template set out in Part A of Annex III. This declaration of compliance shall be referred to as ‘Declaration A’ and shall be issued by the recycler.

3. When recycled plastic is placed on the market and is originating from post-processing operations, batches shall be accompanied by a declaration of compliance in accordance with the description and the template set out in Part B of Annex III. This declaration of compliance shall be referred to as ‘Declaration B’ and shall be issued by the converter that manufactured the batch.

In case a converter issuing Declaration B also performs the decontamination operations, it should ensure that a record equivalent to Declaration A is stored in its documentation system.

4. By way of derogation from paragraph 3, recycled plastic the composition of which is not to be changed in subsequent processing operations may be accompanied by a declaration of compliance in accordance with the description and the template set out

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

in Part C of Annex III. This declaration of compliance shall be referred to as 'Declaration C'.

Declaration C may be issued only by an operator that has received either Declaration A or Declaration B from its supplier, or from an operator that internally issued and stored in its documentation system a record at least equivalent to either a signed Declaration A or a signed Declaration B.

Declaration C shall accompany recycled plastic materials and articles at all remaining marketing stages at which a Declaration shall be provided in accordance with this Regulation.

The composition of recycled plastic materials and articles accompanied by Declaration C shall not be intentionally modified during any subsequent marketing stage. The addition of substances to the recycled plastic during subsequent marketing stages by up to 1% (w/w) in total shall not be considered as a change. The added amount at each subsequent stage shall be indicated in Declaration C.

For the purposes of this paragraph, the composition of recycled plastic materials and articles shall be considered as not being changed by thermoforming and cutting of sheets, blowing of containers from pre-forms, attaching labels and caps, filling with food, labelling, closing, glueing and cutting and other operations that do not modify the chemical composition of the recycled plastic material.

5. Operators carrying out operations that do not change the composition of a recycled plastic material or article may pass on the declaration of compliance that they received with the recycled plastic material or article from their supplier to the next operator in the supply chain, without issuing their own declaration.

6. Declarations A, B and C shall include appropriate instructions based on the specifications, requirements or restrictions set out for the recycling technology applied and, where applicable, for the recycling process used, as well as on the instructions provided in Annex III.

7. Operators shall make available to competent authorities upon request the declaration of compliance that they received from their supplier.

(15) Annexes I and III are amended in accordance with the Annex to this Regulation.

Article 2

Transitional measures

1. Products complying with Regulation (EU) 2022/1616, as applicable before the date of the entry into force of this Regulation, and for which Declarations A or B are required may be placed on the market until [OP, please insert date: 3 months after the date of entry into force of this Regulation] even if they do not comply with the rules concerning those Declarations laid down in this Regulation.

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

2. Products complying with Regulation (EU) 2022/1616, as applicable before the date of the entry into force of this Regulation, and for which this Regulation requires Declarations C or P, may be placed on the market without those declarations until [OP, please insert date: 6 months after the date of entry into force of this Regulation].
3. Recycled plastic materials and articles manufactured from products placed on the market in accordance with paragraphs 1 or 2 may be placed on the market until exhaustion of stocks.

Article 3

Entry into force

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the Commission
The President
Ursula VON DER LEYEN

‘ANNEX III

Templates for Declarations of compliance

Information given in Part A to Part C and in Part P in *italic* font is for explanation only and shall be left out of any fillable field in a Declaration issued in accordance with this Regulation.

All fields in these templates shall be filled, unless stated otherwise in the field.

PART P

Declaration P: Declaration to be used by operators in accordance with Article 6(1)

DECLARATION of COMPLIANCE in accordance with Article 6(1) of REGULATION (EU) 2022/1616 (‘Declaration P’)
I, the undersigned, declare in name of [ADD NAME OF OPERATOR] as identified in Section 1.1, that the partially pre-processed plastic or plastic input identified in Section 1.2 was produced in accordance with Regulation (EU) 2022/1616. Hereby I declare that the contents of this declaration are correct to the best of my knowledge and in compliance with Regulation (EU) 2022/1616.
Section 1: Identification

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

1.1.1	Identity of the operator issuing the declaration		
1.1.2	Address of the operator issuing the declaration		
1.2.1	Identity of the product to which the declaration applies		
1.2.2	Batch Number		
1.2.3	Polymer type*		
1.3	Commodity code used for release into free circulation of the product to which declaration applies, if it was imported		
Section 2: Compliance (see instructions below this template)

4.4 Date and place	

* Polymer type shall be one of the following: PET (Polyethylene Terephthalate), HDPE (High-Density Polyethylene), PVC (Polyvinyl Chloride), LDPE (Low-Density Polyethylene), PP (Polypropylene), PS (Polystyrene), or O (other).

† cross out which does not apply’.

Instructions for section 2; for the purposes of fields 2.1 and 2.2 of this Declaration:

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

- (1) The origin shall be either: ‘EU’; or ‘non-EU’.

‘Non-EU’ shall be used for plastic input containing at least 10% plastic originating from waste that was collected or pre-processed in a third country.

In case the origin indicated in field 2.1, is ‘non-EU’, the commodity code under which the plastic material is imported shall be included in field 1.3 of that Declaration.

- (2) The mode of collection shall be either one or more of the following:

- ‘DRS’, meaning ‘Deposit Return System’ as defined in Article 3(1), point (62), of Regulation (EU) 2025/40 of the European Parliament and of the Council¹, to be used if the plastic input was collected in accordance with Article 6 or Article 9, as appropriate, and by using a deposit return or refund system;
- ‘PCW’, meaning ‘Post-Consumer Waste’ as defined in the introductory part of Annex I to this Regulation, to be used if the mode of collection is not ‘DRS’, but the plastic input originates from post-consumer waste and was collected in accordance with Article 6; or
- ‘NTC’ (Novel technology collection), if the mode of collection of the plastic input is neither ‘DRS’ or ‘PCW’, but was collected in a way specific to a novel technology being developed in accordance with Article 10(1).

In the case of ‘NTC’, the declaration of compliance shall provide the novel technology number as referred to in Article 24(3), if any.

In case the collected material is a mixture of DRS, PCW or ‘novel technology’, the percentages of each fraction shall be provided.

Material originating from a DRS would also be PCW, however, for the purpose of this section only the designation ‘DRS’ shall be used for material originating from a deposit return system, and it shall not be included in the ‘PCW’ content, if any.’

PART A

¹ Regulation (EU) 2025/40 of the European Parliament and of the Council of 19 December 2024 on packaging and packaging waste, amending Regulation (EU) 2019/1020 and Directive (EU) 2019/904, and repealing Directive 94/62/EC (OJ L, 2025/40, 22.1.2025, ELI: <http://data.europa.eu/eli/reg/2025/40/oj>).

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

Declaration A: Declaration of compliance to be used by recyclers in accordance with Article 29(2)

RECYCLERS DECLARATION of COMPLIANCE in accordance with Article 29(2) of REGULATION (EU) 2022/1616 ('Declaration A')					
I, the undersigned, declare in name of [ADD NAME OF RECYCLER] as identified in Section 1.1, that the recycled plastic material identified in Section 1.2 was produced in accordance with Regulation (EU) 2022/1616. The recycled material to which this Declaration applies is suitable for use in contact with food only if it is used in accordance with the instructions and restrictions set out Section 3 of this Declaration, and with the labelling on the product. Hereby I declare that the contents of this declaration are correct to the best of my knowledge and in compliance with Regulation (EU) 2022/1616.					
Section 1: Identification					
1.1 Recycler		1.2 Recycled product		1.3 Competent authority	
1.1.1 Entity name		1.2.1 Tradename / designation		1.3.1 Entity name	
1.1.2 FCM- RON*		1.2.2 Batch No.		1.3.2 Address	
1.1.3 Country		1.2.3 FCM-RIN*		1.3.3 Country/ region	
1.1.4 FCM-RFN*		1.2.4 Other information, if any		1.3.4 assigned Registration Number, if any	
		1.2.5 registration status of installation	☐ newly registered ☐ being established ☐ active <i>(indicate one)</i>		
		1.2.6 Polymer type****			
		1.2.7			

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

		Commodity code(s) used for release into free circulation of the product to which the declaration applies if it has content originating from imported material			
Section 2: Compliance					
2.1 Basis for authorisation or permission to operate (tick one box only)					
2.1.1	☐	Authorisation Decision	RAN*	<i>(add reference to EFSA Q number if authorisation is applied for and still in progress)</i>	
2.1.2	☐	Recycling scheme	RSN*		
2.1.3	☐	Authorisation or recycling scheme not required	<i>(explain reason)</i>		
2.1.4	☐	Novel technology	NTN*		
2.2 Results of compliance assessment as listed in the compulsory quality assessment stages in Table 3.1 of Annex II; compulsory only if field 2.1.1 ticked Important: Fields 2.2.2 to 2.2.4 may be left blank, provided that in field 2.2.5 'Yes' is ticked					
Stage**	Decision criteria and outcome(s)			Batch Number(s)	

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

2.2.1 Exit			
2.2.2 Entry			
2.2.3 Input			
2.2.4 Output			
2.2.5 The undersigned will make the information required in fields 2.2.2 to 2.2.4 available to the competent authority upon its request, within 10 working days			☐ Yes ☐ Not applicable, the information is provided in fields 2.2.2 to 2.2.4
Section 3: Instructions and information to users of the product			
3.1	Instructions to converters		
3.1.1	Maximum recycled content (w/w%)	%	
3.1.2	Present recycled content (w/w%)	%	
3.1.3	Restrictions of use***		
3.1.4	Other instructions, if any		
3.2	Instructions to users further down the supply chain, including end users		
3.2.1	Restrictions of use***		
3.2.2	Summary of labelling, if any		
3.2.3	Other instructions, if any		
Section 4: Signature			
4.1	Signature and company stamp		

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

4.2 Name of person signing	
4.3 Role/position of person signing	
4.4 Date and place	

* RAN – recycling authorisation number; RON – recycling operator number (recyclers); RIN – recycling installation number; RSN – recycling scheme number; NTN – novel technology number; RFN – Recycling facility number.

** Filling out the fields for the exit stage (the batch that is placed on the market and which is accompanied by this declaration) is compulsory. The completion of the other fields is voluntary, but in case this information is not provided by means of this declaration, it shall be made available to a competent authority, upon its request, within three working days.

*** Restrictions of use shall correspond to any applicable conditions as regards application of the recycled plastic, in accordance with Annex I for the applied technology, with Articles 7, 8, or 9 of this Regulation, with the Authorisation of the recycling process, if any, or with any other restriction the recycler deems necessary. If none, please leave blank.

**** Polymer type shall be one of the following: PET (Polyethylene Terephthalate), HDPE (High-Density Polyethylene), PVC (Polyvinyl Chloride), LDPE (Low-Density Polyethylene), PP (Polypropylene), PS (Polystyrene), or O (other).

PART B

Declaration B: Declaration of compliance to be used by converters in accordance with Article 29(3)

CONVERTERS' DECLARATION of COMPLIANCE in accordance with Article 29(3) of REGULATION (EU) 2022/1616 ('Declaration B') I, the undersigned, declare in name of [ADD NAME OF CONVERTER] as identified in Section 1.1, that the recycled plastic material identified in Section 1.2 was produced in accordance with Regulation (EU) 2022/1616. The recycled material to which this Declaration applies is suitable for use in contact with food only if it is used in accordance with the instructions and restrictions set out Section 3 of this Declaration and with the labelling on the product. Hereby I declare that the contents of this declaration are correct to the best of my knowledge and in compliance with Regulation (EU)

		material			
Section 2: Compliance					
2.1					
2.1.1	Origin of recycled plastic; RIN number / NTN number				
2.1.2	Batch numbers recycled plastic from decontamination installation				
2.1.3	Maximum recycled content indicated by recycler (Declaration A, 3.1.1)				% w/w
2.1.4	Actual recycled content of this product				% w/w
2.1.5	Restrictions provided in the Declaration of compliance received from the recycler are met				☐ Yes ☐ Not Applicable
2.1.6	Addition of additives or starting substances	☐ Added additives or starting substances in accordance with Article 5 or Article 6 of Regulation (EU) No 10/2011		☐ No additions	
2.1.7	Registration status of installation	☐ newly registered ☐ being established ☐ active			
Section 3: Instructions and information to users of the product					
3.2	Instructions to users further down the supply chain, including end users				
3.2.1	The product identified in Section 1.2 is: (tick one as applicable)	(A) a recycled plastic for further conversion stages	☐	(for instance, this will be the case if the actual recycled content in field 2.1.4 exceeds the maximum recycled content in field 2.1.3, or if substances were added to the recycled plastic)	
		(B) a final plastic material or article suitable for contact with food without further processing.	☐	(if (B) is ticked, operators receiving this declaration shall issue Declaration C with their products unless they modified the composition of the plastic)	

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

3.2.2	Type or types of food with which it is intended to be put in contact			
3.2.3	Time and temperature of treatment and storage in contact with the food			
3.2.4	The highest food contact surface area to volume ratio for which compliance has been verified			
3.2.5	List of added substances under point 2.1.6 with migration limits; if any, add rows as required (note: FCM Number and specific migration limit ('SML') may not exist for certain substances)	FCM No.**	Other designation (CAS No., chemical name)	SML** (mg/kg food)
3.2.6	Other relevant information and instructions, including in accordance with points 6 to 11 of Annex IV to Commission Regulation (EU) No 10/2011, if any			
3.2.7	The recycled plastic to which this Declaration applies is contained in a layer, in a multi-layer material or article subject respectively	YES / NO		

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

	to Articles 13 or 14 of Regulation (EU) No 10/2011. In this case, for each layer a declaration of compliance issued in accordance with this Regulation, Regulation (EU) No 10/2011 or respective national legislation is kept as supporting documentation in accordance with Article 5a(3).	
Section 4: Signature		
4.1 Signature and company stamp		
4.2 Name of person signing		
4.3 Role/position of person signing		
4.4 Date and place		

* Polymer type shall be one of the following: PET (Polyethylene Terephthalate), HDPE (High-Density Polyethylene), PVC (Polyvinyl Chloride), LDPE (Low-Density Polyethylene), PP (Polypropylene), PS (Polystyrene), or O (other).).

** FCM number as specified in column 1 of table 1 to Regulation (EU) No 10/2011, and SML as specified in column 8 and 9 thereof, if any.

PART C

Declaration C: Declaration of compliance to be used by operators in accordance with Article 29(4)

DECLARATION of COMPLIANCE in accordance with Article 29(4) of REGULATION (EU) 2022/1616 ('Declaration C')
I, the undersigned, declare in name of [ADD NAME OF OPERATOR] as identified in Section 1.1, that the recycled plastic material or article identified in Section 1.2 was produced in accordance with Regulation (EU) 2022/1616. The recycled material or article to which this Declaration applies is suitable for use in contact with food only if it is used in accordance with the instructions and restrictions set out Section 3 of this Declaration, and with the labelling on the product.
Hereby I declare that the contents of this declaration are correct to the best of my knowledge and in compliance with Regulation (EU) 2022/1616.

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

Section 1: Identification			
1.1.1	Identity of the operator issuing the declaration		
1.1.2	Address of the operator issuing the declaration		
1.2.1	Identity of the product to which the declaration applies		
1.2.2	Commodity code used for release into free circulation of the product to which the declaration applies if it has content originating from imported material		
Section 2: Compliance			
2.1.1	Total plastic content in product		gram <i>(total weight of all plastic parts with or without plastic content in product)</i>
2.1.2	Identity, and recycled plastic content in part, including polymer type* <i>(add rows as necessary to cover all parts with recycled content)</i>	Part Recycled content by weight <i>(weight of the recycled plastic in each plastic part comprising more than 5% of the total plastic in the product by weight)</i>	Origin <i>(only add RINs which contribute to more than 5% of the content recycled in accordance with Regulation (EU) 2022/1616, installations contributing to less than 5% of the content recycled shall be left out; add FCM number of substance(s) manufactured</i>

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

			from waste, if the material also contains recycled content that is manufactured in accordance with Regulation (EU) No 10/2011)	
e.g. HDPE Cap	A		RINs/ FCM No (e.g. FCM No 125)	
e.g. PET bottle	B		RINs (e.g. EU1-123-012)	
2.2	Percentage of overall recycled plastic content in product		(∑ 2.1.2 / 2.1.1) x 100% [†]	
2.3	All recycled plastic materials and articles in this product comply with Regulation (EU) 2022/1616 except parts manufactured with plastic manufactured from waste in accordance with Article 1(3) of that Regulation		YES / NO ^{††}	
2.4.1	All plastic materials and articles in this product comply with Regulation (EU) No 10/2011		YES / NO ^{††}	Note that in accordance with Regulation (EU) 2022/1616 also recycled plastics must comply with Regulation (EU) No 10/2011. However, compliance may be assumed if the recycled plastic is fully manufactured in accordance with Regulation (EU) 2022/1616, and added substances/plastics (if any) comply with Regulation (EU) No 10/2011. Note that also Articles 11 and 12 of that Regulation must be met, but there is no obligation to verify such compliance.
2.4.2	Adequate information, specifications or		(please provide information either here or in an annexed document)	

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

statements required in accordance with points 6 to 10 of Annex IV to Commission Regulation (EU) No 10/2011; applicable only to parts manufactured fully in accordance with that Regulation, if any.							
2.4.3 Parts manufactured with substances that have been manufactured from waste are compliant with paragraph 1 of Article 8 of Regulation (EU) 10/2011	YES / NO ^{††}						
2.4.4 Substances added in accordance with Article 29(4); the total added amount at all subsequent production stages subject to Declaration C together ('out') may not exceed 1% (w/w) per part; w/w is expressed as weight of added substances / weight of the plastic part to which it is added.	Part (as in 2.1.2)	'In' column: Amount present in incoming material if subject to Declaration C, as specified in field 'out' in 2.4.4 of the received declaration.	In	+	Added	=	Out
	A		...% w/w		...% w/w		...% w/w
	(add lines as needed)						
Section 3: Instructions and information to users of the product							
3.1.1 Relevant instructions to the users of the product, if any (always include instructions in received compliance documentation if these are relevant for users further in the supply chain)							
Section 4: Signature							

This draft has not been adopted or endorsed by the European Commission. Any views expressed are the preliminary views of the Commission services and may not in any circumstances be regarded as stating an official position of the Commission. The information transmitted is intended only for the Member State or entity to which it is addressed for discussions and may contain confidential and/or privileged material.

4.1	Signature and company stamp	
4.2	Name of person signing	
4.3	Role/position of person signing	
4.4	Date and place	

[†] Here the sum of the weight of all recycled plastic in plastic parts comprising over 5% of the plastic in the product with recycled content is divided by the total weight of all plastic parts in the product to determine the overall recycled content percentage.

^{††} cross out or delete which does not apply

* Polymer type shall be one of the following: PET (Polyethylene Terephthalate), HDPE (High-Density Polyethylene), PVC (Polyvinyl Chloride), LDPE (Low-Density Polyethylene), PP (Polypropylene), PS (Polystyrene), or O (other).
